

Experiment 1: Create a Simple Cloud Software Application as a SaaS

Aim

To create a simple cloud-based SaaS application using Zoho Creator for managing student leave requests online.

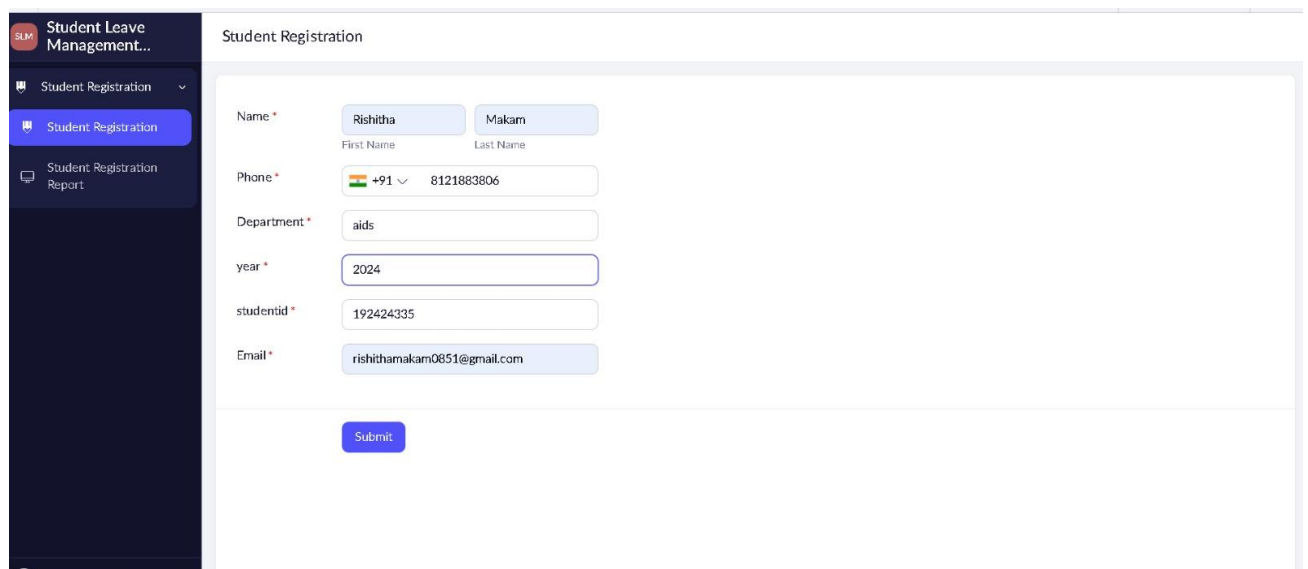

Software Used

- Zoho Creator
- Web Browser (Chrome/Edge)
- Internet Connection

Algorithm

1. Login to Zoho Creator.
2. Create a new application.
3. Create a Student Registration form.
4. Create a Leave Request form.
5. Add required fields to both forms.
6. Create reports for submitted leave requests.
7. Publish the application.
8. Test data entry and report generation.

Output:

The screenshot displays a web application interface for 'Student Leave Management'. On the left, a dark sidebar contains a menu with 'Student Registration' highlighted in blue. The main content area is titled 'Student Registration' and features a form with the following fields: 'Name' (split into 'First Name' with value 'Rishitha' and 'Last Name' with value 'Makam'), 'Phone' (with a dropdown for '+91' and a text field for '8121883806'), 'Department' (with value 'aids'), 'year' (with value '2024'), 'studentid' (with value '192424335'), and 'Email' (with value 'rishithamakam0851@gmail.com'). A blue 'Submit' button is located at the bottom of the form.
