

Experiment 5: Develop a SIMATS Library Book Reservation Application as SaaS

Aim

To develop a cloud-based Library Book Reservation System for SIMATS using Zoho Creator.

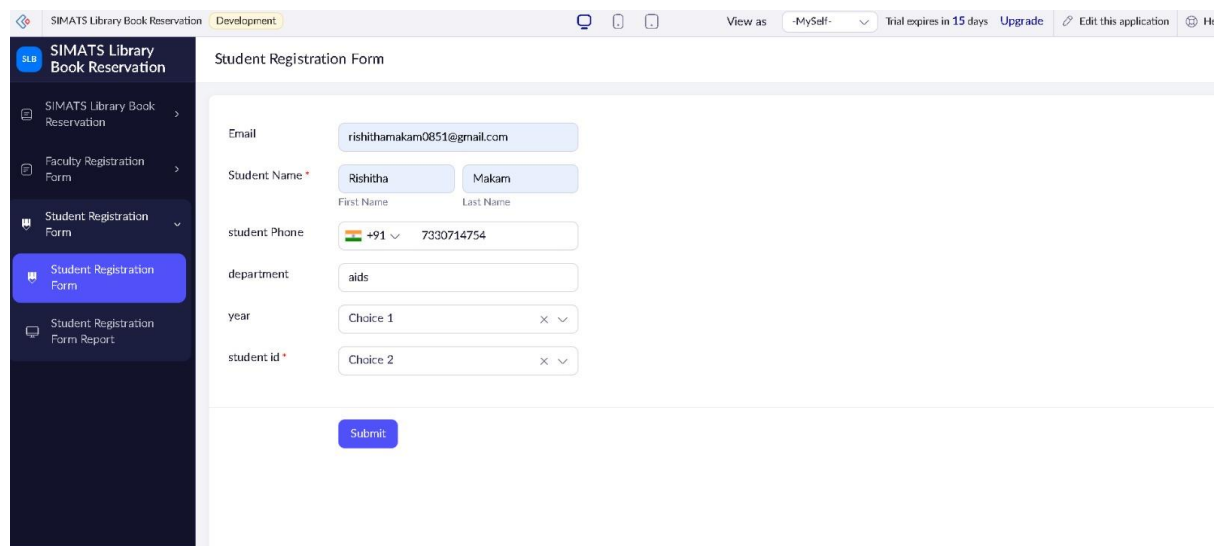

Software Used

- Zoho Creator
- Deluge Workflow
- Web Browser

Algorithm

1. Create Student Registration form.
2. Create Book Details form.
3. Create Book Reservation form.
4. Create Book Issue form.
5. Create Book Return form.
6. Verify book availability.
7. Reserve and issue books.
8. Generate reservation reports.

Output:

The screenshot displays the 'Student Registration Form' within the 'SIMATS Library Book Reservation' application. The interface includes a top navigation bar with options like 'View as', 'Trial expires in 15 days', and 'Upgrade'. A left sidebar lists various forms: 'SIMATS Library Book Reservation', 'Faculty Registration Form', 'Student Registration Form', 'Student Registration Form', and 'Student Registration Form Report'. The main form area contains the following fields:

- Email:** rishithamakam0851@gmail.com
- Student Name:** Split into 'First Name' (Rishitha) and 'Last Name' (Makam).
- student Phone:** +91 7330714754
- department:** aids
- year:** Choice 1
- student id:** Choice 2

A 'Submit' button is located at the bottom of the form.
