

Experiment 6: Develop a Product Selling Application as SaaS

Aim

To develop a cloud-based Product Selling application using Zoho Creator for online product management and sales.

Software Used

- Zoho Creator
- Deluge Workflow
- Web Browser

Algorithm

1. Create Customer Registration form.
2. Create Product Details form.
3. Create Shopping Cart form.
4. Create Order form.
5. Create Payment form.
6. Calculate order amount.
7. Process payment.
8. Generate sales reports.

Output:

The screenshot displays the 'Seller Registration Form' within the 'Online Product Inventory Management System' interface. The form is titled 'Seller Registration Form' and includes the following fields:

- seller name ***: Split into 'First Name' (Rishitha) and 'Last Name' (Makam).
- Phone**: Country code (+91) and number (8121883806).
- Email**: rishithamakam0851@gmail.com
- Address**: Split into 'Address Line 1' (noonevaripalli) and 'Address Line 2' (kadapa).
- City / District**: kadapa
- State / Province**: Andhra Pradesh
- Postal Code**: 516115
- Country**: India
- buisness_name**: readymade garments

A 'Submit' button is located at the bottom of the form. The interface also shows a sidebar with navigation options: 'Online Product Selling', 'Customer Registration Form', 'Seller Registration Form', and 'Seller Registration Form Report'. The top bar indicates the system is in 'Development' mode, viewed as 'MySelf', with a trial period of 15 days and options to 'Upgrade', 'Edit this application', or 'Help'.
